DUNS: 078405270
Cage Code: 6VVL4

CAPABILITY STATEMENT

CONTRACT VEHICLES

- Seaport-NXG
- NIWC 8a Incubator
 - GSA IT-70
(132.51 & 54151HACS)
- GSA IT-70 ITC BPA
 - GSA STARS III

SYSTEM ENGINEERING

- Requirements Analysis
- Test Engineering
- Process Engineering

CYBERSECURITY

- C&A (RMF) (SETA)
- Sustainment IA Patching

DATA ANALYSIS/DBA

- Database Support
- Data Migration
- Data Verification
 - Oracle DBA

PROGRAM MANAGEMENT

- Budget management
- Risk analysis &
management
- Quality management

CORPORATE OVERVIEW

Ward ENG Support Services (WESSGRP) is a software engineering and professional consulting services firm committed to providing high-quality service and helping customers achieve their business objectives through a combination of technologies, people, and processes. Our success arises from our commitment to professionalism, collaboration, and the desire to consistently exceed our customers' expectations.

Founded in April 2013, we committed to providing innovative solutions and services to organizations in both the Federal and Commercial markets. WESSGRP has experience providing technical, engineering and program management services to Federal, DoD, Navy and Marine Corps customers.

VALUES

- Commitment to produce excellence that rises above our customers' expectations.
- Professionalism in supporting our customers' efforts.
- Collaboration with our customers and other customer support organizations to deliver the right solutions that meet our customers' needs.
- Ethical standards that ensure honesty, integrity, professionalism, confidentiality and accountability for all customer engagements.

CORE CAPABILITIES

EXPERIENCE

DON PMW 240/250

- System Engineering
- Cybersecurity
- Oracle Database Support

DHA PEO DHMS

- Cybersecurity
- Sustainment & Development
- System Integration

SYSTEM ENGINEERING WESSGRP has proven experience supporting the acquisition of Information Technology capabilities for the Department of Defense, the Department of the Navy, and the Defense Healthcare Agency during all phases of the acquisition lifecycle. We work with the system owners and vendors to ensure standardization of processes, while verifying that products are implemented using best practices.

CYBERSECURITY WESSGRP coordinates efforts with the various program offices to ensure that the systems are prepared for the Certification and Accreditation efforts under the Risk Management Framework; this includes verifying compliancy to STIGS, reviewing and updating security artifacts, performing scans of the environments, and reviewing mitigation and remediation strategies. WESSGRP collaborates with the appropriate program offices to develop metrics and requirements for new acquisitions.

CYBERSEC DEVELOPMENT & SUSTAINMENT WESSGRP has extensive experience in integrating cybersecurity measures within the system development process, coordinating corrective actions with the appropriate engineers, and performing patch and STIG management to ensure system compliancy.

ORACLE DATABASE ADMINISTRATION WESSGRP has proven experience in managing Oracle Database instances, both standalone and Real Application Clusters.

DATA MIGRATION & VALIDATION SERVICES WESSGRP ensures that data is correctly and effectively mapped, and that procedures are developed to ensure effective data loading. WESSGRP produces comprehensive validation procedures that ensure data integrity of the information prior to going live.

PROGRAM MANAGEMENT WESSGRP's program management approach focuses on the customer's priorities of cost, schedule, and performance across the project teams incorporating a unique understanding and application of security, quality, and information technology.
